

PRO Series Refrigeration (91 cm and 122 cm)

A FRESHER TAKE ON
OUR **BOLDEST** DESIGN

The only thing more impressive than the PRO series' bold exterior is the groundbreaking technology found inside. To keep food fresher longer, the next-generation PRO series is fitted with the most advanced preservation system. Crafted with stainless steel inside and out, it provides a luxurious, professional aesthetic. And now in a smaller 91 cm width, it offers new design opportunities for small and large kitchens alike.

AIR PURIFICATION

Adapting technology used by NASA, Sub-Zero introduces an air purification system that scrubs the air of ethylene gas and odor every 20 minutes

INSTALLATION FLEXIBILITY

Install directly within surrounding cabinetry for built-in, or add accessory panels for freestanding

INTERIOR LIGHTING

Control brightness with soft-on LED lighting that fully illuminates the cavity, making food more visible and less likely to hide

DUAL REFRIGERATION

Preserves refrigerated foods with cool, moist air and frozen foods with frigid, dry air

ERGONOMIC INTERIORS

Easy access to food with a full-extension sliding glass shelf

MAGNETIC GASKET

Locks in temperature and humidity with soft-close door hinge and magnetic seal on doors and drawers

ADVANCED TEMPERATURE CONTROL

Controls temperature within one degree of setpoint via intuitive exterior touch control panel

FILTERED ICE

Automatic ice maker with advanced water filtration system

PRO SERIES REFRIGERATION

A harmonious duet
of *form* and *function*.
