COFFEE SYSTEM AND CUP WARMING DRAWER

# W

## Built-In Coffee System

CRAFT YOUR PERFECT CUP. EVERY TIME.

# BUILT-IN COFFEE SYSTEM

Simpler to use and easy to clean, the newly refined Wolf Built-In Coffee System offers more opportunity to craft and customize your perfect drink—all from the convenience of home.

## SIMPLE TO USE

The full-color touchscreen lets you easily customize every aspect of your beverage. Six independent user profiles ensure favorites are just a touch or two away.

## EASY TO CLEAN

The system is self-cleaning, automatically rinsing at startup and shutdown. Thanks to the unique design of the insulated milk container, milk bypasses the system. Cleaning is as simple as a twist of the froth regulator knob.

## REFINED DESIGN

Not requiring special water lines, the system can install nearly anywhere, and its elegant, modern aesthetic integrates beautifully into kitchens, offices, and bedrooms of all styles.

# Cafe-quality, customized drinks

## ADDITIONAL FEATURES

- Professional-style burr grinder with grind adjustment
- Accepts whole beans or ground coffee
- 2.5-liter water tank
- Height-adjustable, dual dispensing coffee spout
- Care kit, descaling solution, charcoal water filter, and rinse container
- Discreet in-unit storage

## 15+ PROFESSIONAL-QUALITY BEVERAGES

Choose from more than 15 beverage options, including coffee, espresso, cappuccino, latte, macchiato, flat white, and more.

## ADD A CUP WARMING DRAWER

A luxurious complement to your 60 cm Built-In Coffee System, the Cup Warming Drawer ensures every cup is heated to the perfect temperature. It features hidden electronic touch controls and room for 40 tea cups.
